

Credit Name: Chapter 3

Assignment Name: Mastery - Exercise 6

What error message did you encounter (if any)?

```
Exception in thread "main" java.lang.Error: Unresolved compilation problems:  
    Syntax error, insert ";" to complete Statement  
    onesplace cannot be resolved to a variable  
  
    at Mastery.ThreeDigits.main(ThreeDigits.java:19)
```

What unexpected behavior did your program exhibit?

- it displayed this error message

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

- Missing ; at the end of tensplace
- onesPlace is spelled onesplace

Include a screenshot of specific lines of code.

```
// Printing Results  
System.out.println("Hundreds place: " + hundredsPlace);  
System.out.println("Tens place: " + tensPlace);  
System.out.println("Ones place: " + onesplace);
```

How did you fix the issue?

- Correct the spelling

Provide the corrected code or solution using a screenshot.

```
// Printing Results  
System.out.println("Hundreds place: " + hundredsPlace);  
System.out.println("Tens place: " + tensPlace);  
System.out.println("Ones place: " + onesPlace);
```
